Editor's notes

- **The big-ticket work sits on vehicles.** Most high-value items are task orders on agency IDIQs or BPAs (CMS, Army, CBP, FDA) or GSA Schedule orders. For most agencies the near-term move is **teaming with incumbents or vehicle holders**. A solo prime bid usually isn't possible.
- **September is the cliff.** Fiscal-year-end periods cluster at Sept 2027. Our judgement: sources-sought and RFI notices for those follow-ons are most likely in the first half of 2027, so that is when to start teaming conversations.
- **Small-business lane.** Many smaller awards are set aside for small business. If you qualify, the sub-\$10M tier is where a prime bid is realistic.

How we read 'bid or team'

- **OPEN:** standalone contract; a follow-on normally goes out as a new SAM.gov solicitation any eligible firm can bid on.
- **SCHEDULE:** last bought as a GSA Schedule order. Only GSA MAS holders with the right SIN can prime an order placed the same way.
- **HOLDERS ONLY / TEAM:** task order on a multiple-award IDIQ or BPA. Only holders can prime; holders found via USAspending IDVs sharing the parent's solicitation ID.
- **INCUMBENT-LOCKED:** order on a single-award vehicle that stays open past the order's end; new orders can go straight to the incumbent.
- **LIKELY NEW COMPETITION:** single-award vehicle whose ordering period ends around the same time, so a fresh competition is the usual next step.
- Agencies can change acquisition strategy at any time (new vehicle, set-aside, in-sourcing). These verdicts are inferences from past award data, not a forecast.
